

# itsoclear

**“ I couldn't afford implants and I had no other choice but to get a partial denture for my missing teeth. I have had a metal partial for a few years now so I immediately expressed to my dentist my fear of smiling and seeing a metal object in my mouth. He put my nerves at ease explaining to me about the Itsoclear clasp and how they are invisible in the patient's mouth. I have had my new partial for almost a year now and I can't believe how nice it is to not have to think before smiling. I would recommend the Itsoclear clasp to anyone needing a partial denture.”  
Shirley W.**

## Why is Itsoclear superior to other clasps?

- \* Crystal Clear, Will Not Lose It's Clarity
- \* Tooth Bearing Not Tissue Bearing
- \* Easily Adjustable, Dentist Can Do It Chair side If Needed
- \* Perfect For New Partial Dentures As Well As Repairs and Replacing Metal Clasps
- \* Clasp Can Be Formed For Anterior, Pre-Molar or Molar Teeth
- \* Clasps Are 90% Into Undercut
- \* 100% Memory (Can Bend And Material Will Return 100%)
- \* Extremely Durable, Unbreakable
